SYNOPSIS

German-Malaysian Institute (GMI) was established in 1991. It is a centre for advanced skills training that offers courses with hands-on practical and theory in the fields of Productions Technology and Industrial Electronics.

The formation of GMI is a result of a joint venture project between the Governments of Malaysia and Germany. It is governed by a Board of Directors composed of ten representatives from the industry and also the government bodies. This institution is set up as a Company Limited by Guarantee where the founders are Majlis Amanah Rakyat (MARA) and the Malaysian German Chamber of Commerce & Industry (MGCC). GMI had its first student enrollment in 1992 and the number continues to grow until now.

GMI offers 3-year full-time diploma programs in Industrial Electronics (Electronics & IT, Mechatronics, Process Instrumentation & Control, Network Security, Sustainable Energy and Power Distribution, Industrial Plant Maintenance) & Production Technology (Mould, Tool & Die, Product Design & Manufacturing, CNC, Sheet Metal Fabrication & Product Development, Manufacturing System), German A-Level Preparatory Program (GAPP) and Technical Teacher Training Program. Other services include short-term technology-related courses, industrial projects and consultancy.

All GMI programs are industrial-based, and result-oriented. Throughout the years of operation, GMI has graduated students in various fields namely design, manufacture, operation, maintenance, fault analysis and complex production plant repair, machinery, equipment, tools and manufactured products.
