# What is pile foundation ...?

The pile foundation is used to describe a construction for the foundation of a wall or a pier, which is supported on the pile.

### Where it is placed.....?

The piles may be placed separately or they may be placed in a cluster at a column or along the load-bearing wall.

# Where it is adopted.....?

Piles are adopted when the loose soil extended to a great depth. The load of the structure is transmitted by the piles to hard stratum below or it is resisted by the friction developed on the sides of the piles.

# BRIEF OUTLINE OF THE SHORT COURSE

- ✓ Introduction application of piles, effects of installation
- ✓ Ultimate axial pile capacity
- Settlement of piles and pile groups
- Lateral response of piles and groups
- Effects of ground movements on piles

✓ Load testing
